

Stellenbosch University accredited short course

INTRODUCTION TO GREENHOUSE PRODUCTION

Stellenbosch
UNIVERSITY
IYUNIVESITHI
UNIVERSITEIT

The Course

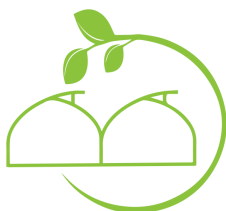

Join us for a comprehensive three-day introductory course on greenhouse hydroponic crop production. This intensive program, led by industry experts, covers essential topics from seedling propagation to harvest techniques. You'll gain hands-on experience in hydroponic systems, greenhouse design, environmental control, seed selection, germination, and nutrient solution preparation.

Don't miss this chance to enhance your skills and boost crop production efficiency! Follow us for details on securing your spot.

Presented By

Martin von Holdt, Owner of Greener Solutions
Emile de Groot, Technica Advisor, Koppert
Francois Kruger, Product specialist at IntelliSeed
Estelle Kempen, Lecturer at Stellenbosch University
